David Clark: Coverage of LegoLeague Robotics Competition

Posted November 13, 2007

Thank you for your coverage of the Monarch High School FIRST LegoLeague Robotics competition. Heath Urie did a great job of capturing the spirit of the event and the excitement felt by everyone present. An important addition to the article is needed to recognize the wonderful sponsors who made this event possible. For the past three years Impact on Education has supported Robotics Education in the Boulder Valley School District through their Tech 21 program. During that time robotics teams in the district has grown from just a few teams to thirty for the

2007-08 school year. Hundreds of elementary, middle and high school students have risen to the challenge of designing, building and programming robots and a great deal of excitement has been generated around the fields of science, technology, engineering and math. This is all thanks to the wonderful generosity of Impact on Education and their many benefactors including Seagate, Excel Energy, Lockheed-Martin, The National Speaker's Bureau and the Luff Family. Our gratitude goes out to these entities, our community is certainly a better place because they are in it.

David Clark

Technology Instructor & Robotics Coach
